

# GROUPTV.COM

## 1- Download putty software:

<http://www.chiark.greenend.org.uk/~sgtatham/putty/download.html>

## 2- Open it and enter you box IP (follow the image bellow)

### 3. Enter your box login details

The image shows a PuTTY terminal window with the title bar "192.168.1.16 - PuTTY". The terminal output is as follows:

```
openpli 4 vuultimo  
  
vuultimo login: root  
root@vuultimo:~#
```

The terminal has a black background with white text. The prompt "root@vuultimo:~#" is followed by a green cursor. The window has a standard Linux-style title bar with minimize, maximize, and close buttons.

#### 4. Enter this command:

```
wget -O /etc/enigma2/iptv.sh  
"http://vip.groupiptv.com:7000/get.php?username=USERNAME&password=PASSWORD&type=enigma216_script&output=mpegts"  
&& chmod 777 /etc/enigma2/iptv.sh && /etc/enigma2/iptv.sh
```

\*\*Please replace USERNAME and PASSWORD with the username and password you receive to your email

5- Restart your device.

Thank you,
